PROJECTS

School database

Dec 2018

- Designed a CRUD web application to manage a school database. It allows users adding, deleting and editing their courses.
- Developed REST API using Node.js and Express
- Created MongoDB database using Mongoose ORM
- Used React to create user interface by dividing UI into composable components

Library Manager

Oct 2018

- Built a CRUD web application to help manage collection of books
- Created SQLite database using Sequelize ORM
- Implemented pagination for list using plain JavaScript

Photo Gallery

May 2018

- Created an image search app with React
- Used JavaScript and JSX to build out the gallery components
- Set up routes using React Router for default topic pages and a search page.
- Applied Fetch API to make AJAX calls and display images in app.
